<b>Office Action Summary</b>	<b>Application No.</b> 10/580,850	<b>Applicant(s)</b> UCHIYAMA ET AL.	
	<b>Examiner</b> Willis R. Wolfe, Jr.	<b>Art Unit</b> 3747	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

The abstract of the disclosure is objected to because the abstract should be a single paragraph on a separate sheet within the range of 50 to 150 words. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3747

Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kamimura et al or Irihune et al. Kamimura et al discloses the claimed invention in Figures 1 and 5. Irihune et al discloses the claimed invention in Figures 1,4 and 8. Kamimura et al or Irihune et al do not disclose the cover being made of resin and the control circuit providing an EGR valve control signal. It would have been obvious matter of design for one having ordinary skill in the art at the time the invention was made to modify the throttle body of Kamimura et al or Irihune et al by providing the a resin cover and the control circuit providing an EGR valve control signal since applicant has not disclosed that this arrangement solves any stated problem or is for any particular purpose and it appears that the invention of Kamimura et al or Irihune et al would perform equally well with such an arrangement.

### ***Allowable Subject Matter***

Claims 1-15 are allowed.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references of Moedinger et al, Krimmer et al ('064), Dismon et al, Krimmer et al ('516) and Coleman et al are cited to show EGR valves at the outlet of the EGR passage at the intake manifold.
